INVESTOR KIT · NOVEMBER 2026

Investor kit.

Sovereign AI, local-first software, and edge models from Nairobi, Kenya — built for the next billion users, not the last data centre.

zabibutechnika@gmail.com

01 / THE THESIS

The next AI market is local-first.

Cloud-first AI assumes fast fibre, the newest hardware, a card on file, and a model that speaks English first. Most of the world does not run on those assumptions. Zabibu Technika builds for the actual condition.

> **Sovereign by architecture.**
> Data and models can stay on the device. Local-first is a product stance, not a marketing theme.

> **Edge AI is the distribution channel.**
> Fikra models and Phosh.cpp are built for modest hardware, intermittent connectivity, and real-world constraints.

> **Consumer products fund the core.**
> Zabibu Arif, Ella, Sigana, and Zabibu OS create distribution while the verified core and enterprise runtime compound.

> **Open core, proprietary edge.**
> Zabibu Weaver and the Phosh.cpp open edition build trust and adoption; Fikra Edge Runtime and the hosted products capture enterprise value.

Why now

AI costs are moving from tokens to infrastructure. Teams want models they can run where the data lives. At the same time, African builders need tools that work on the devices, languages, and networks people actually have. Those two pressures meet in local-first AI.

02 / TRACTION & PORTFOLIO

Two decades of research, twelve shipping surfaces.

FOUNDED
June 2006 · Grape Technologies

FOUNDER
Tehillah Mwangada Kachila

USERS
600+ across Arif & Ella

ARIF
400+ active users

ELLA
200+ users

PRODUCTS
12 surfaces across AI, OS, media, tooling

RESEARCH
Agentic AI paper · Virosauda · LISP

HEADQUARTERS
Nairobi, Kenya

Product portfolio

Zabibu Arif
WORKSPACE & ASSISTANT

Arif Agent
AGENTIC EXECUTION

Zabibu Weaver
OPEN-SOURCE AGENT

Ella
JOURNAL & CARE

Ustadi
SKILLS & MASTERY

Zabibu OS
OPERATING LAYER

Sigana
MEDIA & STREAMING

Phosh.cpp
EDGE INFERENCE

Fikra Edge Runtime
ENTERPRISE RUNTIME

Zabibu Canary
PRE-RELEASE TESTING

Fikra Model 1 - 2B
LOCAL MODEL

Fikra Model 2 - 4B
ADVANCED MODEL

03 / DILIGENCE & CONTACT

What is in the data room.

This public overview is the starting point. The full data room covers the company, product demos, architecture, user metrics, licensing, security posture, and commercial model.

Available for diligence

- Company overview, history, and cap table
- Product demos and usage metrics
- Technical architecture and local-first security model
- Open-source and proprietary licensing map
- Commercial model and enterprise runtime pricing approach
- Risk register, roadmap, and hiring plan

Indicative focus areas

- Fikra model training and edge optimisation
- Zabibu Arif and Arif Agent distribution
- Fikra Edge Runtime enterprise deployment
- Developer ecosystem and open-source adoption
